MEATRACK FOR FIXTURES

Admiral offers a wide variety of transport carts. Our meat racks, of 60cm width, are made to transport your moving heads, lighting bars, or single luminaires. Single luminaires can be hung on aluminium or steel bars, and four or six bars can be hung on brackets.

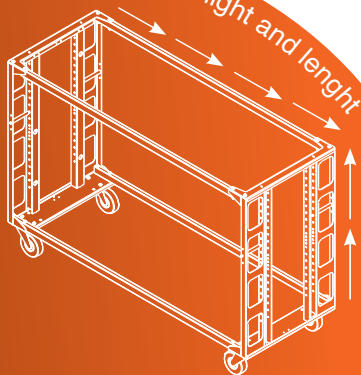

MEATRACK FOR LARGE FIXTURES

Transporting 2kW moving heads or theatre luminaires becomes an easy task using the 80cm wide meat rack for large fixtures.

It accommodates luminaires with a diameter (or base) of 40cm. Install your hanging tubes at the desired distance and start loading!

variable in height and length

NEW

BALLET FLOOR CART

How to transport your ballet or stage floor to and from your venue? The simplest solution is using the Admiral ballet floor transporter. The cart is available in two different lengths (for 150 and 200cm floors) and most rolls can be transported.

A sturdy plastic tube is placed at the base of this cart. This tube can be rotated with a foldable handle. After use, this handle folds itself between the bracket of the cart.

CABLE CART

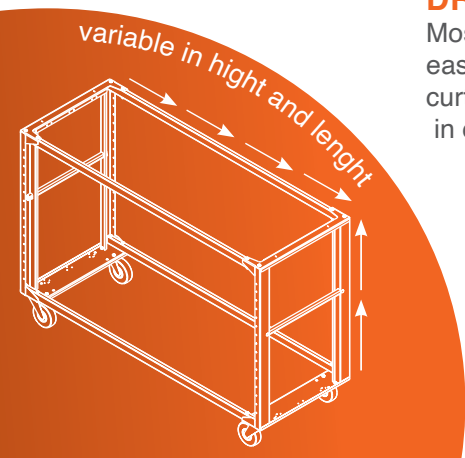

With the cable cart, you can organise your cables easily. In addition, 80mm wide brackets prevent cables from bending too tightly and damaging internal wiring. Place several brackets next to each other or in line above each other for the most convenient layout. Cable studs can be mounted to any available Admiral cart.

DRAPE CART

Mostly used in theatres, this drape cart is the easiest way to quickly store your theatre curtains or backdrops. Admiral offers two carts in different lengths.

The fabric of the bag is able to let air and moisture in and out, so your curtains can breathe to avoid decay.

We also offer an optional dust lid to store your fabrics for a longer period.

SIDELIGHT TOWERS

Sidelight towers can be equipped with moving heads, theatre luminaires, and other lighting fixtures.

The position of the hanging bar can be symmetrical or asymmetrical in this dolly.

The towers are available with or without a telescopic ladder. Ladders can be pushed upwards and a self-winding pull-strap helps you to lift the system before you insert the locking pin to secure the ladder.

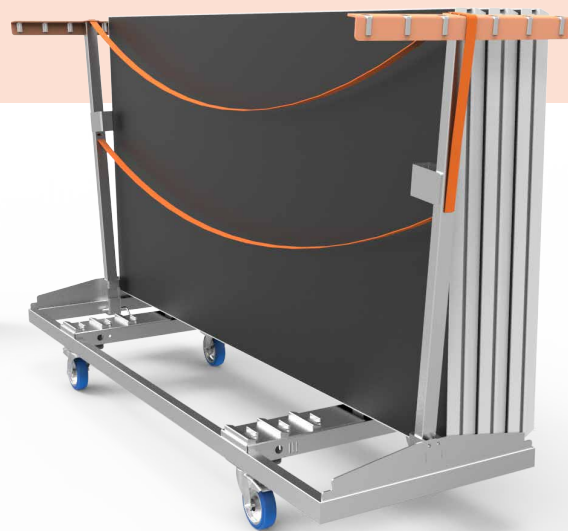

NEW

STAGE DECK TRANSPORTER

We believe this is the first transporter that fits underneath a 40cm stage!

This design offers you the best options for use. You can load and unload the decks in the best possible body positions. After loading the deck, an extra bracket fastens the upper sides of the decks for transportation.

Ridged plastic parts secure each deck firmly onto the dolly and loose items can no longer be found. Last but not least, you can hide this transporter underneath a 40-cm stage!

BASEPLATE CART

This 60cm wide cart can transport up to six baseplates.

A clever designed bottom element allows you to comfortably place the plates onto the car. At the last moment, the plates are tilted into a vertical position. Furthermore, sturdy 160mm wheels ensure a smooth ride over thresholds. A flightcase cover is optional.

From now on, this cart can be ordered for 6, 8 and 10mm baseplates. The carts are available in a length suitable for 73, 80 and 100cm baseplates.

MULTIBRACKET

The Multibracket is the mounting bracket for your Funstrip / Sunstrip or similar fixtures. With this unique, patented mounting bracket, you can mount your strip in any position in your truss.

without
a strap.*

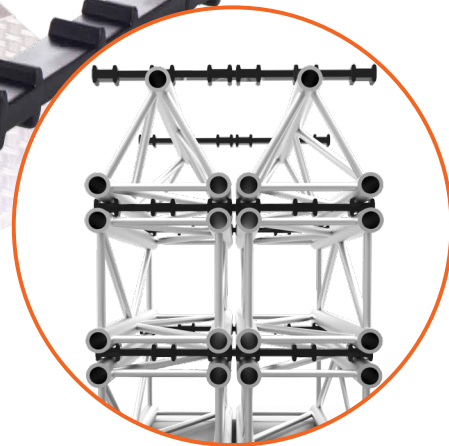

RUBBER TRUSS CARRIER

We do not recommend walking uphill without a strap around your truss dolly. This example perfectly demonstrates the benefits of our rubber truss carrier. Rubber studs are moulded around a rigid aluminium tube. These studs help the truss to stack together more easily with improve stability. They are lightweight, damp sounds, and are easy to stack.

Rubber truss carriers are available for:

- Triangle truss 30
- Square truss 30
- Square truss 40
- Square truss 52

NEW

TECKEL

The teckel is a clever and cost-effective system that you can use to create your own truss dollies. The result is a customisable dolly which allows you to determine the length and number of wheels that fit your specific needs.

Transporting truss up a ramp or over an incline is no longer a hassle.

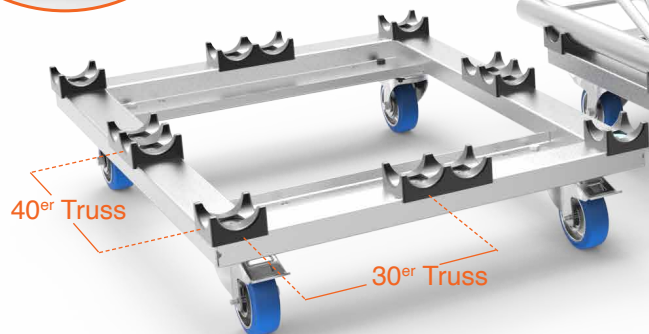

Available for 30- and 40-cm trusses.

UNIVERSAL TRUSS DOLLY: STRONG BOY 3040

We call this item our “Strong Boy”. Because, yeah, this is a strong cart!

Suitable for both 30 and 40 truss, this base is made of strong 2 and 3 mm steel. It's zinc coated to reach the longest lifetime and equipped with rubber studs for optimal friction of your truss. From now on, shifting trusses belongs to the past. As an extra, hooks can be applied on each side of the dolly to secure the load. We predict: Strong Boy is a winner!

SNAKE CABLE GUIDE

The latest development in the field of cable guides is the snake. The snake accommodates enough cables for power and signal. Pivoting hinges, moreover, ensure the cables can be smoothly bent while keeping a minimal diameter. Interlinking parts of only one metre each can be combined to form any base.

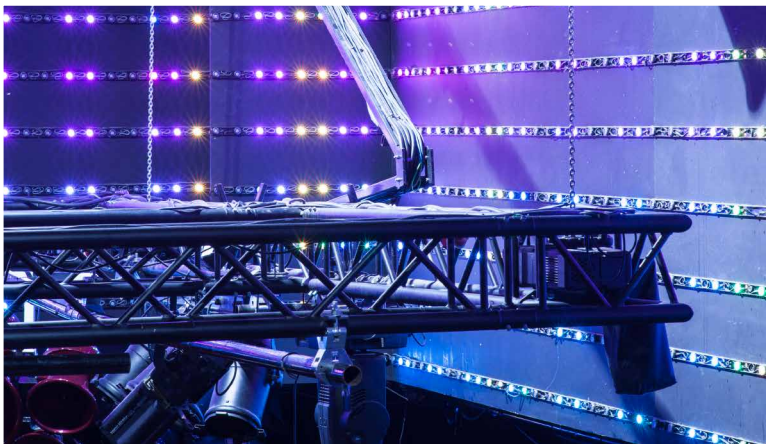

Because of the innovative bending hinges that make full use of the interlocking mechanism, back and forth movement of the truss while hoisting it up and down is almost a thing of the past. With its bronze bearings, this construction ensures years of enjoyment.

and 30-er truss

CABLE GUIDE BASIC

The basic cable guides are a cost-effective solution for routing data and/or power cables upon truss constructions that are hoisted.

UNIVERSAL RAMP SUPPORT

The universal ramp-support offers the possibility to use one support for any length and height of ramp. You can build a ramp with StageDex of 4 or 6 meter in length. Another advantage of the universal support is the fact that it will accommodate stage height increments of both 15 and 20 cm up to a total height of 120cm. Do bear in mind that, for every ramp height length you need a dedicated stage leg length.

NEW

Features

- One support for all lengths and heights
- Uses non-standard stage leg heights 48mm diameter per angle
- For ramps up to 120cm with increments of 15 and 20cm
- WLL per support: 100kg
- Not meant for heavy loads s.a. cars and trucks

RAMP SUPPORT

Always struggling to build a ramp onto your stage for moving flight cases and other stuff up and down your stage? Not anymore. With the Admiral ramp support. You can build a ramp of either 4 or 6 meter. Depending on the length of your ramp a specific housing is available. You can build your ramp using standard round stage-legs. Ramp support is equipped with a unique adjustment feature which sets the legs perpendicular to the floor in the exact angle for a ramp from 40 to 140cm in height.

Features

- Three different supports to choose from depending on length and height
- Uses standard 48mm diameter stage legs per angle
- For ramps up to 120cm with increments of 20cm
- WLL per support: 100kg
- Not meant for heavy loads s.a. cars and trucks

RAMPS

Build your perfect ramp with these compact ramp attachments. The compact size and light weight makes the attachments very manageable. In addition, they hook themselves to the stage decks for optimal safety. The parts are provided with anti-slip rubbers and can be made linkable if desired.

LIFTING WHEEL

This lifting wheel provides many possibilities you've never dreamed possible. The wheel moves up and down 4cm and can be used for three different applications.

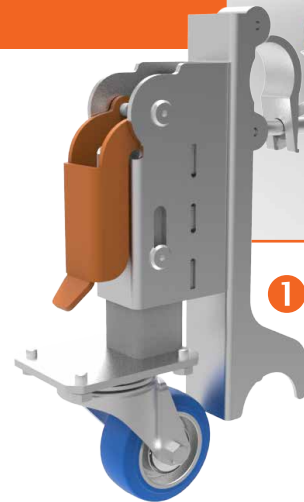

STAGE LEG RISER

The second application is for use underneath a stage riser. In the past, these risers were moved around by using a stage leg with a mounted wheel. Our system is different and gives you two advantages. Using halfcouplers, the lifting wheel can be mounted on a standard leg. When lowering the stage onto its own feet, you experience greater stability and the maximum load can be applied to your stagedeck.

1 TRUSS MOVER

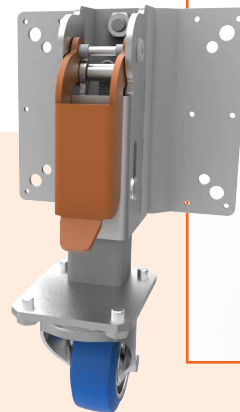

By means of our truss attachment, you can raise truss frames and roll them from the stage as a riser!

3

BOX RISER

And last and certainly not least, the mounting plate attachment is the solution that can attach the lifting wheels onto wood.

STAGE CURTAIN

Skirting your stage has never been faster and easier. With our various sizes of deco-molton rolls, you can instantly create beautiful stages.

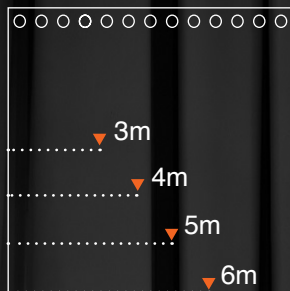

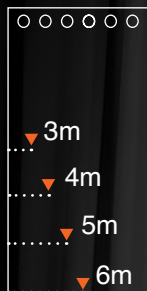

Deco molton is available in black and white, in heights from 20cm, and increasing in width by increments of 20cm up to 100cm. Length: 60m.

You'll receive the best value for money with Admiral backdrops. The fabric is stronger than most 300 g/m² currently available on the market. Available in various sizes and easy to mount using the pre-existing black eyelets separated by 25 cm each.

Available in two standard widths (3 and 6 m) with a length of 3, 4, 5, or 6 metres. Starting from 15 pieces, custom sizes are available.

STAGE

CABLE PROTECTOR

2,3 and 5 channels

This product protects your expensive cables from vehicles and audiences. These protectors are designed for use in high traffic areas. They have a solid rubber base and a bright yellow cover and are available in a various number of channels.

Cable wraps

Bundle all your cables quickly, neatly, and efficiently with the Admiral cable wrap. By means of a clever wrapping system, the cable wraps will stay firmly in place around your cables. With a choice of three lengths and eight different colours, you can come up with endless applications for this product.

RUBBER WRAP

With this rubber band, you can quickly bundle cables in a truss or fly system. These rubber binders are provided with a hook in order to close the loop quickly. Available in various lengths.
